

### **Abstract**

5           A low cost oil, grease removal assembly includes a rotomolded plastic  
container having an inlet and an outlet; a rotomolded plastic basket support located at  
the inlet inside the container; a rotomolded plastic outlet baffle located in the  
container at the outlet; a plurality of container cover sections including a first section  
to cover the basket support, a second container cover section having an oil, grease  
10 removal mechanism downstream of the basket support and upstream of the outlet  
baffle, and a third container cover section to cover the outlet baffle.
